Atichat Chaisarn

AI Engineer in Training | LLM Engineering · RAG Pipelines · AI Agents | Ex-Civil Engineer
Bangkok Metropolitan Area

Summary

I'm an AI engineer building my expertise through hands-on projects and structured self-study, after a deliberate pivot from civil engineering (Chulalongkorn University). My focus is on LLM engineering, retrieval-augmented generation (RAG), and AI agents. Building fluency in LangChain, vector databases, prompt engineering, fine-tuning concepts (LoRA/QLoRA), and multi-agent frameworks (CrewAI, LangGraph, AutoGen). Open to AI Engineer / AI Game Designer roles and freelance opportunities in the Thai market. Featured Skills LLM Engineering · RAG (Retrieval-Augmented Generation) · LangChain · Vector Databases (ChromaDB) · Prompt Engineering · AI Agents · Anthropic Claude API · Fine-tuning (LoRA/QLoRA) · Python · FastAPI · Game Design

Experience

CivilPark International Co Ltd.

Structural Engineer

October 2025 - May 2026 (8 months)

Bangkok City, Thailand

- High-Rise & Mixed-Use Design: Executed structural analysis and design for major residential projects.
- Structural Modeling (ETABS): Developed comprehensive structural models for the Clubhouse building, ensuring stability under gravity and lateral loads.
- Foundation & Slab Design (SAFE): Designed Reinforced Concrete (RC) slabs and foundations
- Complex Load Analysis: Analyzed a multi-story car park structure with mixed-use functional areas, specifically calculating loads for the exercise facilities.
- Developed Revit Model to create accurate 3D structural models and generate detailed reinforcement (rebar) layouts in Revit to ensure precise material estimation and constructability.

Risland Thailand

Building Inspector

May 2025 - May 2025 (1 month)

Thailand

- Responsible for managing the earthquake damage report for the Skyrise Avenue SKV.64 project, which will consist of 4 towers of 46-49 storey high-rise condominium.
- Inspect damage from earthquake in each tower, take photos of the crack damage and make earthquake assessment damage report for insurance claims.

Chulalongkorn University

Building Inspector

April 2025 - April 2025 (1 month)

Thailand

- Inspect each faculty building within the chulalongkorn university for cracks caused by earthquake to ensure the use of the building for university crew.
- Inspect a CU ihouse - chulalongkorn university's dimitory for cracks caused by earthquakes and making damage report to ensure the use of the building for residents.
- Receive instruction and guidance from experts in structural and civil engineering.

NorCiv Engineering Co.,Ltd.

Civil Engineering Intern

June 2024 - July 2024 (2 months)

Construction process learning at Kiak Kai Bridge project construction site. Working on Bill of Quantities (BOQ) of structural component of Standard Steel Bridge for Department of Highways (DOH). Designing I-Girder for walkway structure for The Purple Line - MRTA Project.

Education

Chulalongkorn University

Bachelor of Engineering, Civil Engineering · (August 2021 - May 2025)
